## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- (Currently Amended) An oral composition comprising microcrystalline cellulose
  having an average particle diameter of equal to or smaller than 2-10 micrometers, and one or
  more surface active agents selected from the group consisting of alkyl glucoside and betaine.
- 2. (Previously Presented) The oral composition of according to claim 1, wherein the cellulose is contained at 0.2-10 % by weight of the oral composition.
- (Withdrawn) The oral composition according to claim 1, wherein the surface active agent is alkyl glucoside.
- (Withdrawn) The oral composition according to claim 3, wherein an alkyl chain
  of the alkyl glucoside is C8-C16 in length.
  - 5. (Canceled)
  - (Canceled)
- (Previously Presented) The oral composition according to claim 1, wherein the surface active agent is betaine.
- (Original) The oral composition according to claim 7, wherein the betaine is fatty acid amide propyl betaine.
- (Original) The oral composition according to claim 8, wherein an alkyl chain of a fatty acid portion of the fatty acid amide propyl betaine is C8-C16 in length.
- (Previously Presented) The oral composition according to claim 1, further comprising a cationic antimicrobial agent.

- (Currently Amended) An oral composition comprising a cationic antimicrobial agent and microcrystalline cellulose having an average particle diameter of equal to or smaller than 2-10 micrometer.
- (Previously Presented) The oral composition according to claim 11, wherein the cationic antimicrobial agent is a quaternary ammonium salt.
- (Previously Presented) The oral composition according to claim 11, wherein the cationic antimicrobial agent is a biguanide antimicrobial agent.
- 14. (Previously Presented) The oral composition according to claim 11, wherein the cationic antimicrobial agent is one or more selected from the group consisting of cetylpyridinium chloride, benzalkonium chloride, benzalkonium
- (Previously Presented) The oral composition according to claim 11, wherein the cationic antimicrobial agent is contained at 0.001-10% by weight of the oral composition.
- (Previously Presented) The oral composition according to claim 11, wherein the microcrystalline cellulose is contained at 0.2-10 % by weight of the oral composition.
- 17. (Previously Presented) The oral composition according to claim 11, further comprising one or more surface active agents selected from nonionic and amphoteric surface active agents.
- (Withdrawn) The oral composition according to claim 17, wherein the surface active agent is alkyl having an alkyl chain of C8-C16 in length.
- (Original) The oral composition according to claim 17, wherein the surface active agent is fatty acid amide propyl betaine having an alkyl chain of a fatty acid portion of C8-C16 in length.
